PREFACE

Universal high-quality education is fundamental for achieving full human potential, developing an equitable and just society, and promoting development. Education must build character, enable learners to be ethical, rational, compassionate, and caring, while at the same time prepare them for gainful, fulfilling employment. Pedagogy must evolve to make education more experiential, holistic, integrated, inquiry-driven, discovery-oriented, learner-centred, discussion-based, flexible, and, of course, enjoyable.

Given the 21st century requirements, quality higher education must aim to develop good, thoughtful, well-rounded, and creative individuals. It must enable an individual to study one or more specialized areas of interest at a deep level, and also develop character, ethical and Constitutional values, intellectual curiosity, scientific temper, creativity, spirit of service, and 21st century capabilities across a range of disciplines including sciences, social sciences, arts, humanities, languages, as well as professional, technical, and vocational subjects. A quality higher education must enable personal accomplishment and enlightenment, constructive public engagement, and productive contribution to the society. It must prepare students for more meaningful and satisfying lives and work roles and enable economic independence.

This Central Time Table is a step towards a more holistic and multidisciplinary education. Assessments of educational approaches in undergraduate education that integrate the humanities and arts with Science, Technology, Engineering and Mathematics have consistently showed positive learning outcomes, including increased creativity and innovation, critical thinking and higher-order thinking capacities, problem-solving abilities, teamwork, communication skills, more in-depth learning and mastery of curricula across fields, increases in social and moral awareness, etc., besides general engagement and enjoyment of learning. Keeping this in mind, the present Central Time Table bridges the gap between various faculties by integrating almost all the courses.

Based on the Philosophy of National Education Policy (NEP) 2020, the present Central Time Table provides the flexibility to the students of UG First, Second and Third Year to opt combination of Major Courses form all the Nineteen Subjects across the Four Faculties.

The holistic and multidisciplinary approach of NEP-2020 is also beautifully weaved in the present Central Time Table as it offers all the Nineteen Subjects across the Four Faculties to be opted as Minor / Elective course for students of UG First and Second Year.

This Central Time Table does not include Law from Faculty of Legal Studies and the Subjects under Self-Financed Programs. Though these are also available as Major and Minor / Elective courses depending upon their respective separate Time Tables.

Thus the flexible and innovative structure of this Central Time Table will help to develop all capacities of human beings: intellectual, aesthetic, social, physical, emotional, and moral in an integrated manner. Further, Research will also improve and enhance through the holistic and multidisciplinary educational approach as reflected in this Central Time Table.

*Two roads diverged in a wood,
And I took the one less travelled by,
And that has made all the difference.
-- Robert Frost*

Dr. Gaurang Misra
Professor
Department of Physics
